Advanced Workflow Conversion

RSA Archer Advanced Workflow Conversion service updates your existing workflows to enable powerful new capabilities.

FOLLOWING YOUR UPGRADE TO RSA ARCHER VERSION 6, YOU'LL WANT TO CONVERT YOUR LEGACY WORKFLOWS

Following your upgrade to RSA Archer version 6, you'll have access to its powerful new Advanced Workflow features. Advanced Workflows enable you to design and implement workflows, unique to the needs of your organization, through an easy-to-use graphical interface. The new workflows are more action-oriented so workflow steps can be interpreted as user tasks and reported on the task-driven landing screen.

REDUCE WORKFLOW MANAGEMENT OVERHEAD AND ELIMINATE THE RISK OF UNINTENDED CONSEQUENCES

Being able to manage the lifecycle of records by visually modeling your business process significantly reduces overhead. Conditionally skipping workflow steps is built directly into the solution which, along with workflow specific layouts, decreases the overall number of workflows needed. Another significant benefit is that the Advanced Workflows, unlike workflows created on previous versions, are protected from standard configuration changes; eliminating the risk of unintended consequences. Out-of-the-box workflows are also available and can be activated to expedite deployment.

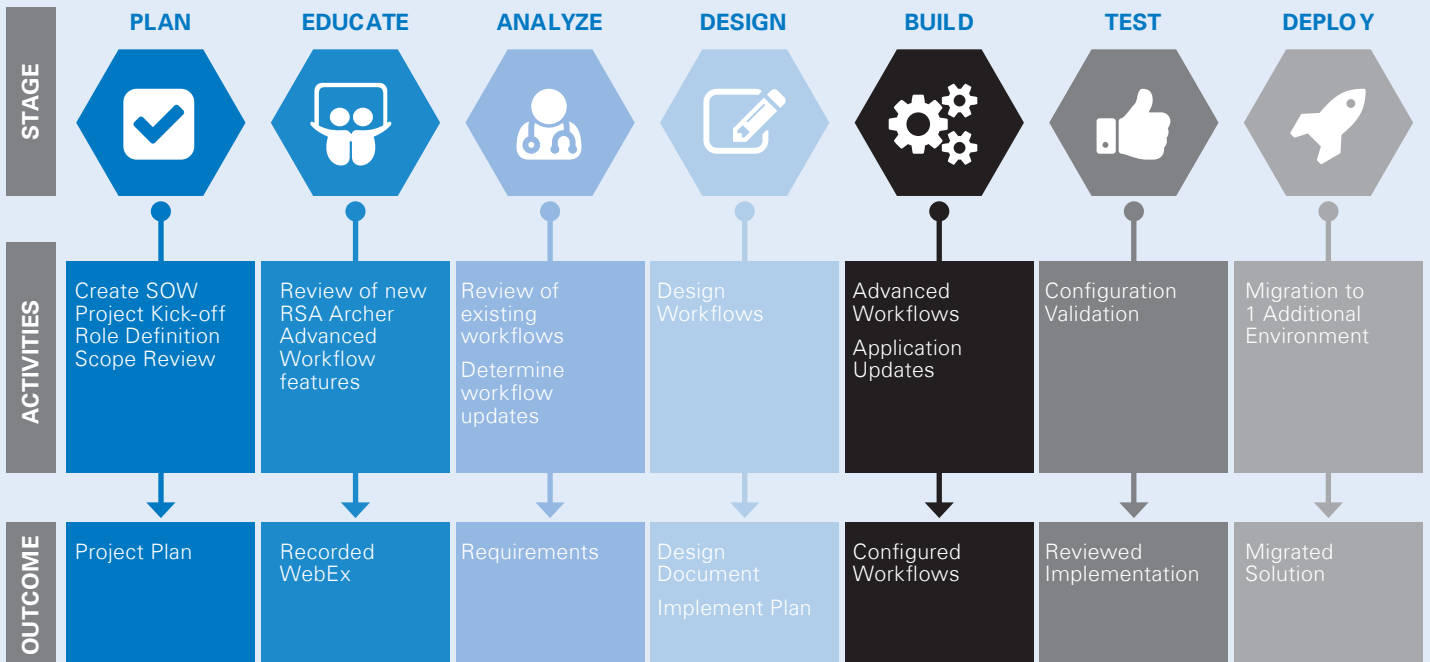

WE WILL GUIDE YOU TO, AND UNLOCK, THE FULL BENEFITS OF THIS POWERFUL NEW RSA ARCHER CAPABILITY

We start by introducing you to what's new in the Advanced Workflow features and facilitate a guided discussion to enable you to maximize your advantage from the new features. Keeping benefits in mind, we design and document your new workflows and develop an implementation plan. We then build, test, and deploy your new workflows.

AT-A-GLANCE:

- Functionality Overview
- Design Documentation
- Configured Workflows
- Knowledge Transfer

RSA Archer Advanced Workflow Conversion Service

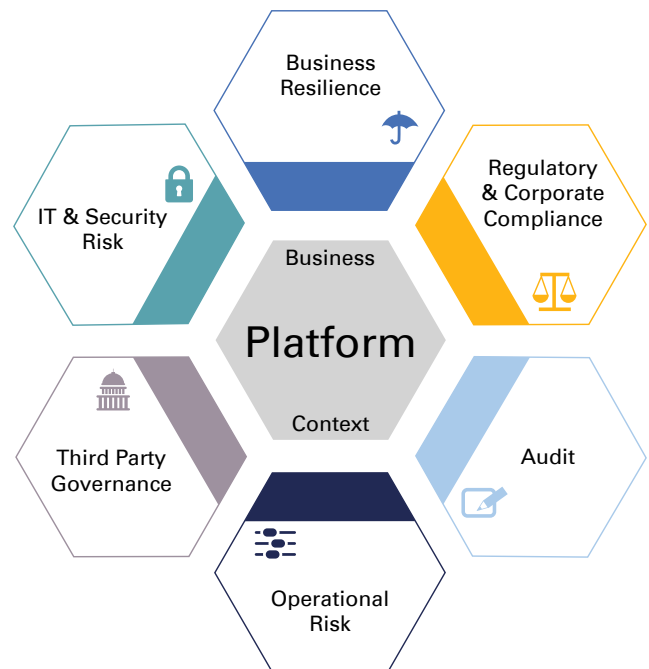

WORKING WITH TUV RHEINLAND OPENSKY, YOU'RE IN THE SAFEST HANDS FOR ALL YOUR RSA ARCHER SOLUTIONS & SERVICES NEEDS
